

HODYON AND LUCAS OIL PRODUCTS, INC. SIGN DYNASYS TRIAL AGREEMENT

– *Lucas to trial the Dynasys APU on fleet* –

(Austin, Texas, September 21, 2010) – Hodyon, a manufacturer and distributor of energy-efficient products and systems that reduce the magnitude of climate change, announced today that it has signed a trial agreement with Lucas Oil Products, Inc. (Lucas Oil), a world leader in heavy duty and high performance lubricants for cars, trucks, NASCAR, NHRA, CORR, motorcycles, boats and industrial equipment.

Under the terms of the trial agreement, Lucas will trial 10 Dynasys systems for a period of 120 days for performance and durability. Upon a successful trial period it is anticipated that Lucas will use Dynasys on all of its fleet of over-the-road vehicles in North America.

“We are pleased to participate in a trial period with Lucas Oil on the Dynasys APU. We believe Dynasys provides a compelling solution for Lucas Oil to reduce fuel expense and provide a comfortable work environment for its drivers,” said David Hancock, CEO of Hodyon. “Our team is very excited about the momentum we have in the power generation market and look forward to more successes in this market.”

Dynasys is Hodyon’s environmentally responsible solution for reducing harmful carbon emissions as a result of over-the-road truck idling. The rugged, stainless steel Dynasys APU is completely independent from the truck system, uses a hermetic A/C system with a one-touch control panel, and consumes less than 20 inches of frame rail space.
